Career Objective

Computer Science Engineering graduate with strong fundamentals in Java, C, and Python. Experienced in building applications using object-oriented programming, version control with Git and GitHub, and practical development through internship projects. Seeking an entry-level Software Developer role to build efficient and scalable applications.

Education

B.E - Computer Science and Engineering

Krishnasamy College of Engineering and Technology | 2022 - 2026 | CGPA: 8.43

Higher Secondary (HSC)

St. Joseph Higher Secondary School | 2020 - 2022 | Percentage: 72.83%

High School (SSLC)

St. Joseph Higher Secondary School | 2019 - 2020 | Percentage: 71.60%

Technical Skills

Programming Languages: Java, C, Python

Database: SQL

Web Technologies: HTML, CSS, JavaScript

Tools & IDEs: IntelliJ IDEA, PyCharm, VS Code, Git, GitHub, Git Bash

Soft Skills

- Quick Learning
- Time Management
- Adaptability
- Task Prioritization
- Punctuality

Internship

Java Programming Intern - CodSoft | July 2025

- Completed a one-month internship working on multiple Java projects using object-oriented programming.
- Developed and tested applications with focus on file handling and clean coding practices.
- Used Git and GitHub for version control and project submission.

Academic Project

AI-Powered EB Smart Meter (Flask, MQTT, TimescaleDB)

- Built a real-time smart meter simulation system for electricity monitoring.
- Designed time-series database architecture for efficient energy data storage.
- Developed a web dashboard for live tracking of voltage, current, and power usage.
- Integrated basic AI-based analysis for energy insights.

Hackathon

AI Legal Guardian - HCL GUVI Career Carnival 2026 | Individual Participation

- Participated in a contract analysis challenge involving requirement interpretation.
- Analyzed complex problem statements and identified structured solution approaches.
- Applied logical reasoning to propose effective solutions under constraints.

BugOps AI - AI-Powered Engineering Operations Platform | Solo Hackathon Project | Jul 2026

- Built a web-based platform for bug tracking, release readiness assessment, and engineering health monitoring.
- Developed AI Commander, which generates executive summaries, risk assessments, root-cause insights, and actionable recommendations using multiple AI providers and Demo Mode.
- Implemented the solution on Lemma using tables, agents, workflows, and scheduled triggers, and built the frontend with HTML, CSS, and vanilla JavaScript.

Achievements

- First Prize - Code Fest 2025, Krishnasamy College of Engineering and Technology.
- Second Prize - Code Fest 2025, Krishnasamy College of Engineering and Technology.

Certifications

- **Java Programming Internship Certificate** - CodSoft | August 2025
- **Java Programming Course** - GeeksforGeeks | March 2025
- **Certificate Course in Python (CCP)** - CSC Computer Education | 2022

Languages

- Tamil - Native
- English - Professional Working Proficiency
