Career Objective

Detail-oriented Computer Science Engineering graduate with hands-on experience in Python, SQL, Power BI, and data visualization. Experienced in analyzing large datasets, building interactive dashboards, and generating data-driven insights through real-world projects. Seeking an entry-level Data Analyst role to support business decision-making through data analysis and reporting.

Education

B.E - Computer Science and Engineering

Krishnasamy College of Engineering and Technology | 2022 - 2026 | CGPA: 8.43

Higher Secondary (HSC)

St. Joseph Higher Secondary School | 2020 - 2022 | Percentage: 72.83%

High School (SSLC)

St. Joseph Higher Secondary School | 2019 - 2020 | Percentage: 71.60%

Technical Skills

Languages: Python, SQL

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Tools: Power BI, Excel, Jupyter Notebook, Git, GitHub

Core Skills: Data Cleaning, Exploratory Data Analysis (EDA), Dashboard Development, Data Visualization

Projects

ShopAnalyze - E-Commerce Sales Analysis (SQL, Power BI, Excel)

- Cleaned and analyzed **51,290+ transactional records** to identify revenue trends and customer behavior.
- Discovered shipping cost patterns showing **100% cost concentration in specific courier modes**, highlighting optimization opportunities.
- Built a **1-page interactive Power BI dashboard** to monitor **51K+ orders** and product performance.

Netflix Content Analysis (Python, Pandas, Matplotlib, Seaborn)

- Processed and analyzed **8,807 titles**, including **6,131 Movies** and **2,676 TV Shows**.
- Visualized genre distribution and yearly release trends to identify content growth patterns.
- Identified peak content additions in **2019 with 2,016 releases**, providing insight into platform expansion.

RoadSafe - Road Accident Data Analysis (Python, Power BI)

- Engineered data pipeline to analyze **1,469,995 accident records** and **1,985,803 casualties**.
- Built dashboards to identify seasonal and regional accident trends across large-scale datasets.
- Calculated **1.30% fatal accident rate** using Power BI DAX measures for risk analysis.

Internship

Java Programming Intern - CodSoft | July 2025

- Developed Java applications using object-oriented programming principles.
- Practiced file handling and debugging for real-world scenarios.
- Used Git and GitHub for version control and project submission.

Academic Project

AI-Powered EB Smart Meter (Flask, MQTT, TimescaleDB)

- Built simulation system to monitor electricity usage data.
- Designed time-series database structure for energy tracking.
- Developed dashboard to visualize voltage, current, and power usage.

Hackathon

AI Legal Guardian - HCL GUVI Career Carnival 2026 | Individual Participation

- Participated in contract analysis challenge involving requirement interpretation.
- Analyzed detailed problem statements and identified key solution steps.
- Applied logical reasoning to propose structured solutions.

BugOps AI - AI-Powered Engineering Operations Platform | Solo Hackathon Project | Jul 2026

- Built a web-based platform for bug tracking, release readiness assessment, and engineering health monitoring.
- Developed AI Commander, which generates executive summaries, risk assessments, root-cause insights, and actionable recommendations using multiple AI providers and Demo Mode.
- Implemented the solution on Lemna using tables, agents, workflows, and scheduled triggers, and built the frontend with HTML, CSS, and vanilla JavaScript.

Achievements

- First Prize - Code Fest, Krishnasamy College of Engineering and Technology.
- Second Prize - Code Fest, Krishnasamy College of Engineering and Technology.

Certifications

- **Google Cloud Data Analytics Certificate** - Google Cloud Skills Boost (via Naan Mudhalvan) | 2025
Credential: [Credly Badge Link](#)
- **Python Programming Certificate** - CSC Computer Education | 2022

Languages

- Tamil - Native
- English - Professional Working Proficiency
